Juneau Sitka Ketchikan

A dramatic hillside location offering historical buildings, densely forested wilderness, quiet bays for sea kayaking, and the famous Mendenhall Glacier.

One of the world's most pristine and beautiful wilderness areas, this area is the summer nesting grounds for the American Bald Eagle and the densest population of Brown Bears in the world. In this area look for Humpback Whales, Brown Bears, Dall's Porpoise, Stellar Sea Lions, Seals and Eagles up close and personal. The long summer days allow ample time for cruising and exploring in the evenings.
